## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. Claims 1-15 are rejected under 35 USC 103(a) as unpatentable over Avery Graphics(1996) in view of Bayesian Systems(1992).
2. As per claims 1-15 Avery-Graphics teaches a method of interactively gathering information on a page including questions, responses, response evaluation(page 2). Avery also teaches addressing customer requests(page 1) and product selection by category(page 1). In addition to that taught by Avery Graphics, Bayesian Systems teaches inferential logic engines(Page 1).Bayes teaches elegant solutions for most inferential logic problems(pager 1) as well as having the inferential engine being embedded in one's software to perform diagnosis(page 1).Bayes also teaches entering evidence through the software system(page 1). Bayes also teaches that the inferential engine can be embedded in GUI with multi-media as well as data mining(page 1).It would have been obvious to one skilled in the art at the time of the invention to combine Avery in view of Bayes to teach the disclosure. The motivation to combine is to teach an interactive product selector with an inferential logic engine.

### ***Claim Rejections - 35 USC § 112***

3. Claims 1 is also rejected under 35 USC 112(2<sup>nd</sup>) for failing to point out and distinctly claim what is the invention. The independent claim is too broad.

**Conclusion**

**4.9 THIS ACTION IS MADE NON-FINAL.**
